....claimed.

Anyway. I recall some people were making a total conversion for ren which was based on the original C&C - is that still around? I forget what it was called.

Commando attempt 1 or 2. I THINK that Axel Snog is still working on one but I can't be sure.

C&C Commando 1 lead by Seaman/CommandoSR is at Half Life 2

Some of the old team from Commando 1 started work on a TD mod for Ren (didn't get an official name, although it was called Renegade Dawn).

The team leader, Axel Snog revived the conversion but couldn't continue with the project and had to abandon it. He said I could continue it but I didn't like the responsibility leading an FPS mod.

The assets I created for this are now being slightly modified for my RTS mod, C&C: Tiberium Nascence.

Wait a second, isn't Renegade already based inside the original C&C Tiberian Dawn World?

yeah, but it's nothing like it. I think the only similarity is the names of the vehicles.
