Subject: Patch error - CnC Reborn (old version)

Whenever I download the English version listed on the Reborn web site, I get the following error message when I try to install it:

Old File not found. However, a file of the same name was found. No update done since file contents do not match

Is this a problem with the old version or something else I've installed (RenAlert, both Core Patches)? Or is my computer retarded?

So you're trying to patch Renegade with an old Reborn patch?

Um...erm...

Damn.

Ok, never mind then. Now I know what I was doing. I was looking for the actual old mod itself. Sorry, I'm a dumbass.
