Listen you guys, Im a noob here.

I wanted to create a server for so long and I finally got a serial to do so. Now, when I type in ALL THE CORRECT INFORMATION, the prompt says Failed To Create Server, over and over. Please, if ytu can help me, post!

Also, If I need to forward ports, state so. Thanks!

Try waiting longer than a hour and half for a responce..

Anyway, that error will be your serial is not valid/in use or your password does not match your user name

You can now use your own (game)serial for hosting servers.

Not anymore. They turned on serial authentication again for XWIS a few days ago.
