OK, so im trying to host my server everything has been working, and now all of a sudden it starts saying

Creating game channel...
Failed to create game channel
Creating game channel...
Failed to create game channel
Creating game channel...
Failed to create game channel
Creating game channel...
Failed to create game channel
Creating game channel...
Failed to create game channel

says the same thing about 10 times then server shuts off
anyone know what to do. Everything is configured right i have tripple checked everything. I erased everything, and re-installed the server. Nothing seems to help. anyone know what to do?

Make sure your FDS serial is valid. XWIS turned on serial validation recently, making them require valid serials. It's a bunch of poopoo if you ask me.

You can use your Renegade serial (for the client = the one on your manual) for the FDS too .
