Hi, I'm not quite sure which section this belongs in, so please move it if necessary. A player by the name of frager420 used some kind of rate of fire cheat on multiple servers today, two of them being BCServ5 (Black-Cell.net AOW) and a0000000 (n00bstories.com AOW/CCM). I have annotated logs from Black-Cell's IRC where he gets tons of weird pistol kills (which he claimed were made by a sniper rifle), as well as a Fraps video of him killing people extremely quickly with a chem gun. Both the .wmv and the xvid .avi are the same video; they just have different quality. You can find those files here:
 http://bcserv5.black-cell.net/~pub/havoc9826/cheaters%20(act ive%20ones)/frager420/
What makes him different from many cheaters is that he was logged into Renguard at the time. Can you please review my evidence and ban him from the Renguard network, so he no longer has this excuse to hide behind? Thanks for your time.

Definitely a cheat. Visceroids don't kill in 1 shot. Kudos goes to havoc9826 for his excellent evidence. frager=n00b

I got about 10 reports of this guy today. He's banned from the network.

For those of you who haven't caught it yet,
RG is not flawless!

But it's close.

EDIT: Heh. If anything is flawed, it's my connection.
