I've read all the topics of people having the same problem as me but none of them help. When I start Brenbot I get a message saying "IRC Initialization...joining irc.n00bstories.com:6669 my nick is megamoo18 IRC: Disconnect detected.. reconnecting in 60 seconds". And I get that message over and over again.

Please help,  
MegaMoo20

You might want to try another nick for your bot. That sometimes helps. If that doesn't help try posting your brenbot.cfg here somewhere.
