This is a great update, it gives you so much things, I do believe that this is a sort of demo version, it does give GDI 6 new tanks and NOD 8 new tanks, but I am sure that it is still great CHECK IT OUT AT:

It was pretty good mod, too bad it is pretty much dead. Not enough support from community, ignorance from players...

I hope that someday, someone will make it known and popular again... Someday....

There are no new tanks, just semi-working "plains" and half-assed textures.

The Reborn leak was better than this garbage...
