WHEN I USE RENGAURD IT ALWAYS CRASHES MY GAME! I do have a very good virus, spyware, fire wall system, but I tell it not to block access to the internet to the game. But it still crashes, what can I do?

It, doesn't exactly crash, it just doesn't boot up. I open up renegade, the Rengaurd window opens up, it connects does all of the things necessary, like find the servers and so forth, then it says that some error occurred, and then it disconnets.
