My Desktop at school in C++ class, where I do most of my posting from. I can't change the wallpaper, I can't add icons, I can't do anything.

Edit: The file's too big, and I can't download any programs to make it smaller. Dammit...

I've used Gentoo before. It's really annoying to have to compile every god damn thing you get.

Gentoo is designed for people who know which compile flags work best with their computer, and are willing to tweak make.conf a bit.

I've found it a lot easier to use on 64-bit systems rather than depending of (often broken) 64-bit packages from binary distros.

Meh. I don't have time to work on it. That's one of my old little projects. My current desktop is a bit different. Nothing special about it.

Maybe I'll start working on it again? I have a working portal GIF and stuff. Oh, well. I hate school.

I would like to say it's the other one I attached but lets be honest. That one makes it a day or two and I go back to my favorite. I like the 3D stone marble Metallica the best.  
The DarkVader has a cool illusion, a DARTH Vader helmet with big hollow eyes. and a Grim Reaper figure.
