All 4 desktops on my windows system.

I also have SuSE inside VMWare, and access to netBSD at Uni.

My Desktop at school in C++ class, where I do most of my posting from. I can't change the wallpaper, I can't add icons, I can't do anything.

Edit: The file's too big, and I can't download any programs to make it smaller. Dammit...

I've used Gentoo before. It's really annoying to have to compile every god damn thing you get.

Gentoo is designed for people who know which compile flags work best with their computer, and
are willing to tweak make.conf a bit.

I've found it a lot easier to use on 64-bit systems rather than depending of (often broken) 64-bit
packages from binary distros.

Subject: Re: OT: Another desktop thread

View Forum Message <> Reply to Message

I probably will use Gentoo again when I have a 64-bit processor.

Meh. I don't have time to work on it. That's one of my old little projects. My current desktop is a bit
different. Nothing special about it.

Maybe I 'll start working on it again? I have a working portal GIF and stuff. Oh, well. I hate school.

I would like to say it's the other one I attached but lets be honest. That one makes it a day or two and I go back to my favorite. I like the 3D stone marble Metallica the best.
The DarkVader has a cool illusion, a Darth Vader helmet with big hallow eyes. and a Grim Reaper figure.

I had that desktop for a while. Then I changed to something that wouldn't scare my female friends. They don't like Metallica much.

Nineball, what Winamp doohicky are you using to get those sliders and where do I get it from?

Subject: Re: OT: Another desktop thread
Posted by cheesesoda on Tue, 16 May 2006 11:45:27 GMT
View Forum Message <> Reply to Message

I'm sure it's just Winamp 5 with the Classic skin, and that's probably just the EQ sliders. That'd be
my guess.
