I just got a new headset for my PC and am wondering if there was a mod to implement voice chat.

I haven't heard of any myself, but lots of servers have a companion Teamspeak server. Go download the RC2 Client at www.goteamspeak.com and see if a server you play on has a Teamspeak server as well.

Also check out:

<http://www.teamspeakoverlay.com/>

It allows you to see the names of people chatting whist you are playing.

One word of caution though: should you choose to run Fraps, you can't use Teamspeak Overlay at the same time (Teamspeak by itself is ok, though).

Yea, The voice chat mod is TeamSpeak as they say above (This reply might be late, I just felt like going through Google and stuff)
