Hi guys,

im creating a private bot in c++ to run on our renegade servers and i was wondering if someone can tell me how i can incorporate a half renguard option in this bot like brenbot and NR.

Thanks buffymaniack

Can no-one help me? Possibly someone from the bhs/brenbot/Nr team, give some advice?

Thanks if you can buffymaniack

u will need to ask someone from BHS for permission for the RG protocol

i got it from mac when RG was first released, only recently decided to implement it
