Well I have been having problem with RenGuard... Ever since it came out. I try to fix, I get friends to help, I never wanted to bother to come here becuase usually it won't send an activation e-mail, well it did, so I am comming to you and is expecting a solution.

Now, I just re-installed renegade (Corrupted Internet Files) and now it works fine. I am trying to re-install RenGuard but I have:

Rename Scripts.dll to Script2.dll. It's located in the C:\westwood\Renegade folder or the C:\Program files\EA games\The first decade\Renegade.
