you could use JFW_MSG_Zone or JFW_TMSG_Zone, but they send F2 / F3 chats respectively, not a PM.

There is also JFW_PPAGE_Zone which sends a popup page to Nod, GDI or both.

Use JFW_PPAGE_Zone.
It will send a private message to the player that entered the zone.
The player type in the script specifies which player type will trigger the script/effect.

What script would you use to make the green writing like on mp practice?
