sorry to double post, if that is the whole path, sorry to waste your band-with on the website, but you can see how i would think that there is more text to the path

upgrade to NightRegulator BETA 3

RenGuard is built-in

3.0 may also come out this week so u will auto-update to it

EDIT: and yes that is the full path

up early lol, look at this this is F****** mad, i tryed to start renguard so it will protect my server, but look at this whacky pic my NR went mad and came to life, it just kept doing that over and over and over even tho the connection was terminated i was spooked out, well i cant upload the pic it was to big, but I'm telling the truth, it just kept saying like "aaaalexo6 is running CP1 or later"
"aaaalexo6 is running CP1 or later"
"aaaalexo6 is running CP1 or later"
"aaaalexo6 is running CP1 or later""aaaalexo6 is running CP1 or later""aaaalexo6 is running CP1 or later""aaaalexo6 is running CP1 or later"

over and over again and it was causing serious laggggg

NR 0.30 works nearly 100% with the built-in RGsupport
