I'd imagine this is the only thing that I do and will agree with you. People have always made dooms day predictions as to when the world will come to an end. I have yet to see any prediction with enough evidence behind it to sway my opinion.

Religion likes to predict stupid things like this. Apparently the apocalypse is coming in 2012.... I'm sure it is . If religion was right about 10% of the things they said We would be long gone by now Lol.

Don't generalize. It's a sign of a weak mind.

"Jesus began to say to them...'when you hear of wars and reports of wars do not be alarmed; such things must happen, but it will not yet be the end...but of that day or hour, no one knows, neither the angels in heaven, nor the Son, but only the Father. Be watchful! Be alert! You do not know when the time will come.'" - Mark 13:7, 32 - 33

The world is always about to be destroyed by something or other. It gives the tinfoil-hatters something to worry about.

I strongly urge everyone to look around themselves and look whats going on in the world before talking serously making up your mind about this topic. Periodically everyone should ask themselves are you happy about what you are doing, do you like it, if you do that's great.

It won't go that soon in my opinion but what happened to that Meteor that was supposed to collide, Once it was public we weren't really too panicky-poo and it was supposed to be here in 14years which was said a few years ago but

Fyre

I do not think the WORLD will end, per se, but I do think civilization is in a bit of danger.

Civilization also appears to be improving.
the only type of things that scare me slightly is things like global warming,
which I dont is going to be something that all happens at the same time. As in a few weeks, like
in the movie DayafterTomorrow

The movie The Day After Tomorrow wasn't implying it would, if you like it's an example of what could happen over a long period of time if we don't start respecting our planet. Though a lot of people on this forum don't even believe global warming exists. They'll call you a crack pot for believing it does exist. According to DarkDemin the world is cooling down not heating up.

DarkDemin is half correct though, where I live temperature has been on the rise gradually (the earth does go through cycles of increasing and decreasing in temperature, but this has been unnaturally long and on the rise). But in other places the temperature will be lowering.

The chances of us doing anything about our polution by the time Global Warming starts making more of an effect, SLim.

And of course by us I mean them. And by them I mean the people that own the crap that polutes our air.
