Well then when I try to put my server up it says failed to create game and keeps on going. So I don't know exactly what the problem is but that's what I think you need a serial number. But now people from irc are saying you need a serial number even though it is XWIS. I know you start it with 0669 the first 4 digit numbers.

Just start your number with 0669, and then just fill the rest in with random numbers. It should work.

Xwis checks for valid serials now, unless thats only for when going online in the game itself, but you might have to find a valid one. I posted one not long ago.

I think I remember Blazer saying something about using your Renegade game serial as well.

Ok I will try that Matt. But look at this everyone:

[20:42:53] *** Auto starting game. Type 'quit' to abort ***
[20:42:53] Initializing Westwood Online Mode
[20:42:54] Detecting bandwidth...
[20:43:05] Upstream bandwidth of 512k bps detected
[20:43:06] Got server list
[20:43:07] Got server pings
[20:43:07] Logging onto XCC WOL IRC Server
[20:43:08] Logged on OK
[20:43:08] Applying server settings
[20:43:08] Creating game channel...
[20:43:24] Failed to create channel
[20:43:24] Retrying channel create
[20:43:24] Creating game channel...
[20:43:24] Failed to create channel
[20:43:29] Retrying channel create
[20:43:29] Creating game channel...
[20:43:29] Failed to create channel

You see it keeps on saying failed to create channel.
I don't know what that means.

 Try Use the encripted serial from the registry if you have not already, that should work.
