Hi guys, been having this issue with the game not been able to exit properly, just gets stuck on a black screen and eventually exits with a windows error, although sometimes have to kill the process to get rid of the black screen. Anyone else having these issues?

Btw: How is the 1.4 coming along? I ve been with the game for 5 years now and I reckon the renguard is the best thing thats been done for Renegade. Keep up the good work

A solution could be to just alt-tab, then exit renguard which will close your renegade instance. At least it should stop the crashes (and it's faster).
