Players whos names are underlined when they speak were running RenGuard at the time of the incident. (That is a convention of CloudyServ.)

Luckly for me, I got a script to pick up on this (alerts operators). Anyways i beleive i seen snoopy159 Play in my server. I asked him to get tested. He came, Only when we were beginning to start he "lost connection". It might have been another snoopy but im almost certain it was this one.
