www.renegadewiki.com -> search in "useful programs"

You need the Renegade FDS, Brenbot 1.41 (or another regulator), the latest SSAOW preferably, and a pair of good brains to understand all of it. There are some tutorials around for setting up brenbot (exemple: [http://www.thekoss2.org/new\\_game\\_info\\_fds.php](http://www.thekoss2.org/new_game_info_fds.php)).

To be honnest: we don't need yet another server, over 60 % of the servers are always empty.

To be honest: we don't need yet another server, over 60 % of the servers are always empty. 75% and 85% never reaches half the players it can handle. What would you expect with crazy amounts of players per server like 40-80...
