Check out this link, and pay attention to the following line:

Quote:There are now 1,989 known Apollos.

Perhaps the interpreters got the word wrong, and it's not the year 2000 that is the end of life, but "Apollo" 2000!

Heh, this one will miss.

Though I want it to be a clear night. It will be an interesting way to celebrate the birthday of two countries. At least two that I know of.
