For this line of code, how do I match up the spawning properties with the spawning code.

Thanks for any help!

```
Commands->Disable_Physical_Collisions(Commands->Create_Object("GDI_Gunboat",Pos));  
Pos.Z += 35;  
Commands->Disable_Physical_Collisions(Commands->Create_Object("GDI_Ceiling_Gun_AGT",Pos));  
Pos.Z += 15;  
Pos.Y += 0;
```

I would guess he was trying to mount an AGT gun on a GDI gunboat? Maybe?

i would think you need to attach the gun to a bone of the gunboat if it's intended to move.

also, why are you changing the position after the creation of the object? shouldn't it before you create it?

another thing to keep in mind is that += 35 will set your whatever in the sky... to make this perspective for you, the barracks is about 28 in length, and 11 is hieght of the structs for the small guard tower.

Well actually its a serverside thing, the GDI Gunboat is actually the AGT.
I had the first one set to the right height and I had already tried adding the pos. before the creation of the Object.
However it did not work after I added 2 objects, but its probably something small.
