Kalle Bowo has developed a few new purchase icons for both GDI and Nod recently (in celebration of passing his A-level exams apparently wink.gif). Featured are the GDI Light Infantry and Tiberium Soldier, as well as Nod's two heavy plasma-armed infantry-- the fearsome Cyborg Commando and his lesser human brother, the Kerubim. Take a look over here to see all four.

actually, the current CyC is not true to TS, since the old one didnt have a stomach area . Instead, you could see a metal spine (there was an old render somewhere...).

It still is Renegade->TS and is supposed to stay true, or as close as possible, to the original.

Will or won't it be true to the original is the creator's choice afcourse

It's based on TS/FS, not a direct translation.

Exactly. It is based on TS/FS but with its own twists.
