Sup guys i thought id register to let you guys in on how to fix that annoying start button bug! Heres my post from non00bs. Enjoy (btw it has been prooven to work)

If ever you cant see the player list or you cant click the start button heres the solution.

Enter the player list screen and if it shows no1 there just stay in that window until the server automatically kicks you for idling. Once you have been kicked rejoin the player list and tah dah! theres the start button!

Jelos my solution?

A while ago, I got a server side soltuion for this. Noone ever gets it again at our server now. If only i could remind names... I think it was whitedragon who gave it to me (don't shoot me if I'm wrong).

If ever you cant see the player list or you cant click the start button heres the solution.

Enter the player list screen and if it shows no1 there just stay in that window until the server automatically kicks you for idling. Once you have been kicked rejoin the player list and tah dah! theres the start button!

Jelos my solution?

That doesn't work. I've tried that, it doesn't always work. Hell, it hardly ever works. Usually I just get kicked for idling again.

If ever you cant see the player list or you cant click the start button heres the solution.

Enter the player list screen and if it shows no1 there just stay in that window until the server automatically kicks you for idling. Once you have been kicked rejoin the player list and tah dah! theres the start button!

Jelos my solution?

Or just tell the server owners to download this fix:

<http://blackintel.igotfree.com/index.php?page=downloads>

It should fix the bug.

I will shoot you Confusing me with WhiteDragon, how could you

But, as cat already told, you can find the serverside fix at our site

Removing the FPS limit, does it actually show up ingame as 700 as it did when you tested it, or does it still show as 60?

It shows the real FPS count ingame too
