is anyone else getting this error after they install renguard adn renegade from TFD:

"Error creating hash of serial,try reinstalling renegade"

i can play renegade without renguard but not on pure servers.. and i tried with and without the (tm).

Didn't work for me. I get the Wol.data key error. And the solution it lists doesn't do anything.

Just tried using my old serial from my first purchase of Renegade and that doesn't work either.

Did you try the changing name of woldata.key (I think they talk about it here:
<http://www.renegadeforums.com/index.php?t=msg&th=19350&start=0&rid=4882>)?

Nope. Nothing doing that either. Of course that didn't say anything about the Woldata.key, that was about the whole (tm) thing, which didn't help either.
