OK...

I uninstalled renegade because I have been having alot of problems with the game. And when I re-installed the game, my serials are invalid. I have 3 different serials and they are all invalid now. WTF?!?! I have searched online for a serial, and they are all invalid too. I have gone to wall mart, target, best buy, comp usa, etc. looking for renegade, and nobody sells it. Can one of you nice people please please PLEASE donate your valid serial to me? That would be great...
thanks
