I'm not sure if this is a ban, per-say, but I'm a bit concerned.

RenGuard

[19:56] To launch Renegade, please click 'Renegade'.

[20:09] Your attempt to use the lan-exploit has been logged and will be reviewed.

[20:09] Disconnected from RenGuard network

What the hell does that mean, and what did I do?

If you did nothing special, then you can ignore this. It's a false positive that pops up from time to time. Don't be worried.

Funny, I use a LAN, and I've never gotten a weird message like that. Why would a LAN help you in Renegade? I lose connection if my dog walks past the adapter for crying out loud...

Er, I have no idea what you guys really mean, do I?

In the first version of Renguard, people would load renguard on one computer in their LAN and Renegade (with cheats) on another computer in their LAN. Same LAN = same external IP.  
Capiche?

No, not really, but thanks.

Er, I think I get it now.

So I'm not about to be banhammered? Members of BHS aren't going to break through my window and break my face?

\*Sigh of relief\*

Nah, no worries. BHS tends to hire out hits like that. They won't break through your window themselves.
