Hi Renegade fans,

I Play Renegade on an 28Inch 16:9 CRT widescreenmonitor, but if i set the resolution on
widescreen, e.g. 1280x720 or 1920x1080 then Renegade is all streched up.
So i need to edit the Field of View of the 3D view, anyone knows how to find and edit the FOV??
I've looked for cfg-files and looked in the register but i cant find it

thanks in advance,

greetz from Dereck

It looks sweet streteched man! I have mine to 1920x1200 so don't complain!

Edited this portion out : Let's let this newbie do it alll on his own

You can use the extended renegade config menu to set its resolution ingame to 1280x768, that
should be ok for your screen.

Download the extended config menu here ->
http://www.lmsbc.com/html/downloads.php?cat=2#10

Setting the resolution is not the problem.
But if i set the resolution on e.g. 1920x1080 then the 3D-view is streched, so i want the edit the field of view, can i?
I cant edit the FOV with this extended config tool.
