it gives me this error when starting to install core patch 2

"List index out of bounds(250310834)"

any idea what it means and how i can fix it?

no
But I found out it probably got something to do with me having C&C FD and installing renegade with that while renguard was still on my comp
some other guy had it to he uninstalled renguard, installed rneegade again then installed renguard and got it to work
Im gonna try soon havent had time yet.

Thanks anywayz Gozy I will dl it manually if thiswont work

Don't forget to take (TM) out of the install path.
