Well guys, i will not say much because my english is not so good, but here go a screen shot of my problem:

Nohing appears, no letters, no words ...

Hope you guys can help me, thanks!

I had this once. Uninstall everything that has to do with Renegade. I mean everything, registry and all. Then reinstall. If that doesn't work, reinstall Renegade in a different directory.

I had this only once and rebooting the computer fixed it.

You guys are crazy. This is a registry issue. The easiest thing is to re-install in another directory.

I have Re-Installed 3 times and dind't work ...

Now I will installing in another directory and see if it works!

Thanks for the help guys!

Well, I was going to re-install, but i decided to check the game one more time ... and the letter are

there aigan ...

I think cmatt42 has gived the solution! Thanks cmatt42!

And thanks for you guys too for giving some attention ...

Registry issue... heh.

You're welcome.
