Reminds me, there are also some sounds that are missing (mostly in single player). There a way to get those back?

This is completely untested, but here's how you should be able to do it.

CP1 / CP2 put extra sound files in always.dbs, along with a couple of other things. Easy way to get rid of them: delete always.dbs... but what about the other files? Easy, I extracted them and put them in a zip file, so if you extract the files from the attached zip file on this post into Renegade\Data, and then delete always.dbs, you should be OK.

NOTE: As I said above this is untested, so if it does not work put always.dbs back and delete the three files from this zip.

NOTE2: File was too big for attachment, heres a download link instead ->
http://www.lmsbc.com/downloads/renegade/cp2_files.zip

If anyone from BHS has a problem with this 'fix' let me know and I will delete the zip from the web server.

Thanks,

All the files that cp 1 and 2 are really downloads from various sources like

<http://www.ren-archive.com>
<http://www.planetcnc.com>
<http://www.cnc-source.com>
<http://www.renegade-help.com>

i study this and if you want to change somethin' i think you can put the always.dbs file in level edit in your mod folder, to change it, if i rember right

I just removed them form the always.dbs (the annoying countdown sounds)

now i cant join RG....anyone have the CP2 always.dbs or can i use the original .dbs from 1.037?

You always could go the safe way and reinstall RenGuard/Renegade.
