I've recently got the first decade and installed it with everything working fine. i then tried out renegade and found out about renguard so i downloaded and installed it no hassle at all but know i notice that no text is a appearing when i load the game or join a game, it was there before i got renguard. So what could the problem be????????? I get text whilst in a game and on the game choosing menu.

Thanks in advance to all that help.

p.s. how do u add pics and vids to your personal signature

What RenX said, also download these things to update your Renegade installation and improve it:

1.Install the 1.037 patch.
2.Install No-CD crack if wanted.
3.Install RenGuard if wanted.
4.Install CP1 if wanted. (RenGuard should ask you if you want to download it, if it doesn't, download it here.)
6.Install CP2 if wanted. (RenGuard should ask for it.)

5.Install an updated version of the scripts.dll if wanted;

http://prdownloads.sourceforge.net/rentool...21.zip?download

Here's the install instructions:

1. Download the file.
2. Open it and only select scripts.dll and bhs.dll.
3. Open up your main Renegade folder (C:\westood\renegade) and look if there is a scripts2.dll, if there isn't then rename scripts.dll to scripts2.dll.
4. place the 2 selected files into your default Renegade folder.

The First Decade already comes with the 1.037 patch pre-installed.

Don't worry; this is normal. The Core Patch 2 removes the text from the loading screen.

If it's the loading screen your talking about ya, what everyone else said above. In the first Core Patch, they replaced the text with info on the new maps they've added, but they got a few complaints and put it back to normal... but without the text. I think it's just a bug they forgot to fix but nothing big. The game loads really fast that you dont' even get to read the boring text . Though, if it's another thing than the loading screen, tell us.

nukchebi0 wrote on Tue, 22 August 2006 01:20For all of you, the No-CD crack comes with
Core-Patch 2.
And what does this have to do with this issue?

all of you, the No-CD crack comes with Core-Patch 2.
And what does this have to do with this issue?

They mentioned it some where as having to be installed seperately from Core Patch 2. This is not
the case.
