Yesterday, on Black-Cell Marathon, we had a Renguard bypasser by the name of scrowcrow. One of the other half-mods (I am one myself), baddon0x, was asking him how he repaired a mammoth tank when he was nowhere near it, and though nothing came of that, Bommae, one of our division leaders (senior moderators) went into spectate mode to watch him just in case. In our spectate mode, a moderator is invisible and completely undetectable except for barely visible footsteps and a very quiet walking sound. He/she is even removed from radar. Somehow, scrowcrow was able to track him, as evidenced by this video (page transcript here). This led to a screenshot request, which would have the invisible Bommae standing next to me, supposedly unbeknownst to scrowcrow. scrowcrow had an odd request of his own. We then moved around the power plant to get a better shot. He apparently took the shot, which I'll show later, and tried to paste it in Paint with no luck, according to him during the next map. He had also quit and rejoined before that, because of what he claimed was a broken connection, but the IRC bot said otherwise.

Then, scrowcrow took another screenshot, which Bommae declared unacceptable. After receiving a bunch of stall responses, I temp banned scrowcrow and e-mailed him with instructions on how to find the Screenshot###.png from the previous map, which he did find, rename, NOT EDIT (weird, huh?), and send to Bommae. Here's his screenshot. Compare that to my screenshot, and you notice he has 1/999 Timed C4s, targeting on the PP instead of me, a bunch of flags for empty medium tanks and med shells on his radar that I don't have, and a yellow dot on his radar where Bommae was invisibly standing, which is absent in mine. As soon as this was discussed, Bommae permanently banned scrowcrow. I guess he won't be wanting to add this screenshot to his collection after all.

After he was banned, scrowcrow apparently tried to convince Bommae that it was his brother (whom he had told me about earlier regarding WinXP access restriction to \Renegade\Data\) who may have put cheats on his game. However, the video shows that he's able to track someone who should not be showing up on radar, and his tracking was a deliberate action. Clipping the HUD off of the "make-up screenshot" also damages his credibility, as he should have had nothing to hide (except his radar hack). He was also on Renguard at the time:

[13:01:49] <&BCServ4> scrowcrow has joined the game, fighting for team GDI

[13:02:17] <%havoc9826> !pi

[13:02:18] <&BCServ4> Total players: 30

[13:02:18] <&BCServ4> GDI players: bigboom74(R)(S)(X), +HeroKerr(S)(X), zelinko0(R)(V)(X), SAalan(S)(X), youdolt(R)(S)(X), sc0rny(R)(S)(X), matkeown(S)(X), snipperss(S)(X), braner101(R)(S)(X), xx3xx3(S)(X), Fraggedya(S)(X), scrowcrow(R)(S)(X), bommae(S)(X), havoc9826(S)(X), baddon0x(E)(X), shocker18(S)(X)

[13:02:18] <&BCServ4> Nod players: cacique34(S)(X), lonos1989(S)(X), aik7(S)(X), OmegaNXC(S)(X), cobrazax(R)(S)(X), iwannadi(V)(X), kilostorm(R)(S)(X), tumbletom(S)(X), lavawing(S)(X), kobramstr(S)(X), MaYDeY(S)(X), HTLzrdman(S)(X), sdiamn123(S)(X), metalcp(S)(X)

^--- (R) means Renguard, (X) means XWIS, and you can ignore the (S), (E), and (V)

I request that scrowcrow be banned from Renguard so he can't hide behind it. Also, please ban gogozee, as I'm sure he's the same person, or the "brother", since that's what his e-mail screenname was. If anyone can shed any light on who his "brother" is, if he even exists, I would appreciate it.

Your HUD shows up when you die? Mine sure as hell doesn't.

True, but notice that he was an sbh, and judging by the laser shot through the sniper window, this screen was taken in the tunnel up against the Nod base (I know lizard, so I can ask him to verify this if you'd like), so there was plenty of time for him to take a screenshot of the Deadeye before he was seen and killed. I'm pretty sure he deliberately did that so we wouldn't see the HUD. He also had been trying to get me onto the bridge to take a second screenshot with him, but regardless, he had already left and rejoined the game, so any screenshot after that (including this one) could not prove innocence.

What would be fun, is if this guy and his "brother" came on here and we had another flame war like last week.

No point of banning him from RG.. The *cheat name removed* makes up a fake serial number. So banning it would be pointless.

If it was a radar hack, its probably not a renguard bypass. Most of the radar hacks i know about, work with regular renguard and cant be detected

The new *cheat name removed* has the radar hack built in it.
