Well ive been trying to host a FDS for testing purposes but i get.

[22:49:39] *** Auto starting game. Type 'quit' to abort ***
[22:49:39] Initializing Westwood Online Mode
[22:49:39] Detecting bandwidth...
[22:49:55] Upstream bandwidth of 512k bps detected
[22:49:56] Got server list
[22:49:56] Logging onto USA Server
[22:49:58] Logged on OK
[22:49:58] Applying server settings
[22:49:58] Creating game channel...

And it keeps repeating that its trying to create the channel. I read that it has to do with either you nick,pass,and serial. I have my nick + pass correct and i used both my FDS serial + Renny serial and its still screwing up. Any ideas why?

Hehehe, What happened to the good old days AmunRa.

Anyways. I reinstalled the FDS and even redownloaded it. Double checked my Ren & FDS Serials. And my login + Pass. They are all correct. The FDS worked before... Any ideas why it wont work?

Check over the settings in the regulator you are using.

The regulator will have nothing to do with creating game channels, thats a problem with the FDS settings somewhere most likely.

I wasnt using a regulator (bot). After i got this problem i began using one too see if any errors would appear. I even put a differnt nick + pass. Still getting this error. Perhaps its my serial in a way???
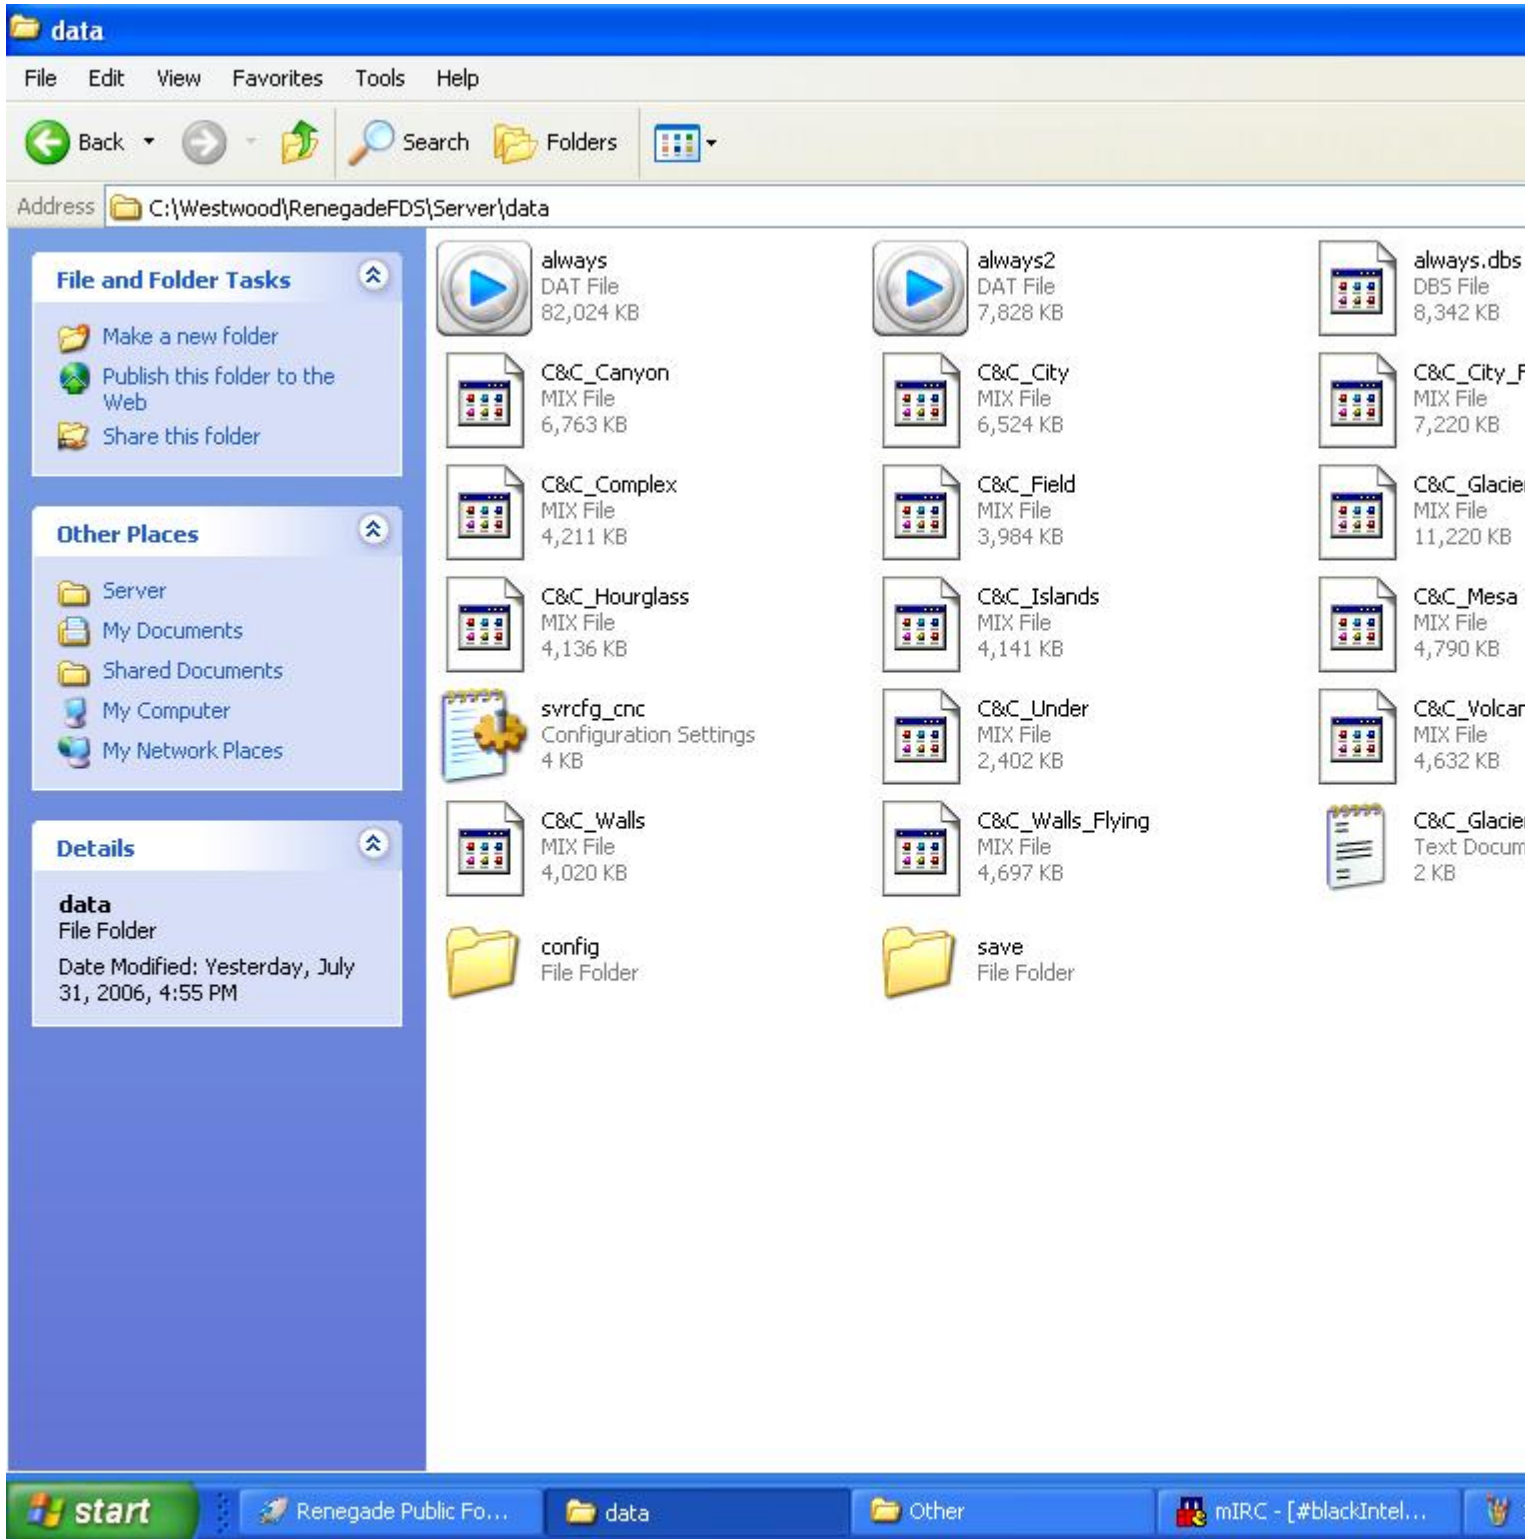

I had my server + svrcfg_cnc files checked and they had no errors.

Here are some SS of my folder incase theres a file missing.

Yes, but, some regulators re-write server.ini and the svrg one in data folder.
