im starting to go into server side mods, so would someone be able to find me a page where it lists all the scripts, what they do, and how to use them?

thank you.

p.s, i've checked <http://renhelp.laeubi-soft.de/> and it hasnt got anything like im looking for.

well, a list of the original scripts... I don't know where that is (if it is existing)
A list of the new scripts is including when you download it, by the readme.txt

readme.txt lists all the scripts in scripts.dll. all the other scripts are the originals from scripts2.dll, most of which have a clone in scripts.dll

Actually, thats incorrect. I have clones of only a small fraction of the scripts in the original scripts.dll, it just happens that most of the ones I have cloned are the ones that are usefull (one of these days I will finally clone Test_Cinematic
