Figure out which actual monitor it is, model number and such and compare it to these:

<http://www.newegg.com/Product/ProductList.asp?N=2090190020+50001077+1309821317&Submit=ENE&Manufactory=1077&S ubCategory=20>

As for the flash drive, find the specific one here:

<http://www.newegg.com/Product/ProductList.asp?N=2010170522+50001459+1309421173&Submit=ENE&Manufactory=1459&S ubCategory=522>

On the flash drive neither of the newegg flash drives are 69.99 even with shipping. So at the least, you'd be saving about 5\$ if you order through them.

Other than this we can't really tell you if they are a deal without more information, things like the model numbers or wether or not they are used.
