ok i need help, im new here but ive been playing renegade for a long time, and i have renguard version 1.03 and this is what it says when i try to get cp2

RenGuard has detected corrupt files. In order to install core patch 2, you need to download fixed copies and extract them to your renegade directory. Mix files (maps) belong to the data directory.

Click on these download links, unzip the files and put their contents in your Renegade/data directory to overwrite your files that do not match our expected profile, and when your done restart RenGuard.

C&C FeildTS

C&C Snow

what do i do?!?!

Click on the links (on the map names) and download them. Unzip them and copy them to your renegade/data - folder. Overwrite the old files. Then restart renguard and it should work.

You could also hit the options button in renguard and disable core patch updates.

Then you should not use one, before you cause problems for yourself, and even worse, your computer. Hopefully it is your computer.

Ohhh I'll pray for that computer tonight.

How do you want him to learn it? By watching TV?
