Does anyone know where I can get the "No Gameplay Pending" Patch for the FDS?

I looked it up and could only find one place and that was at  
[www.game-maps.net](http://www.game-maps.net) Which no longer works.

Does anyone know another place to get this patch at?

I noticed that game-maps.net has been deleted but I was lucky enough to get the patch again. I'll be uploading it in the Utilities section of my download section soon ([www.yuricomunity.tk](http://www.yuricomunity.tk)), but instead of making you wait here's the file.

#### File Attachments

Why there is no a Client Gameplay pending patch? It is so simply to do I made an exe (non patch) for my purposes on base of above ccpatch.exe. Firstly patched server.dat, compared original and patched, then in HEX Workshop edited a Renegade's (non FDS) Game.exe. And it's works fine

Edited: now i checked my theory Renamed original Game.exe to server.dat, succesfully patched it by ccpatch.exe and renamed back it to Game.exe All works too
