need some help whit BETA2 server
i always get this:

and i dont know what it is
how can i get in the server ?

i dont like rpg, but you need to contact the server owner and ask them(nicly) to disable. the firewall

or disable your firewall as it could be blocking incoming traffic; renegade servers are what keep the position of all the players and if it cant send you that...well, it's fairly obvious

ps. i know its not server side as i joined that server successfully once
