Hey, you all might know me as SF1eagles, I play St0rm AOW all the time.

I had to reinstall ren, long story made short Renguard said a file was missing, maybe it was, but I uninstalled RG and it pretended it was still installed and such. Doesn't matter.

So I reinstalled ren, I was missing cd's and keys so I downloaded it off someones FTP, the iso's, used Alcohol %120 to install it, thats all fine, the serial I got from there doesn't work. It worked to install but when I logged in to Westwood/XWIS, XWIS told me that my serial key is invalid, and I can't play online. I could reinstall with another key but I have ALOT of stuff in Data and its a hassle to move all these files, scripts, maps, skins and such.

Any idea's other than reinstall w/ another key?

-> to change serial

Do not use servers from the Net though, they'll be banned from xwis already.

Well alot of serials are probably banned, depending on whether or not anyone got them banned from cheating in another C&C game.
