Here is my "big problem" I just got cp2 installed and after that i started up the game go to wol and login and the server/game list is blank no server displayed and i have done eveything to refreshing it, logging out logging back in, logging in with a different account, restarting Renegade, Restarting computer and still nothing on the list but i can still make my own games but i can not see any other games to join someone help!!!!!!

P.S this is my first post.

Did you do the 1.037 patch before installing renguard and cp2?

I can only advice you to reinstall from scratch in a new directory, following these instructions:
[http://www.thekoss2.org/article.php?menu=game_info&cat=\[REN\]Installing](http://www.thekoss2.org/article.php?menu=game_info&cat=[REN]Installing)
