If you HAD to choose a method of death: Being killed by the Obolisk, the AGT, or a firing squad with bad shooters wich one would you choose? EDIT:Make that a drunk firing squad.

Obelisk: Instant death...vaporization

AGT: If you are LUCKY you get direct hit with a missle which is instant death...if you are unlucky you get machine gunned to death which probably doesn't feel too good.

I chose the Obelisk of Light.

...But Havos survives a direct hit... man he must have a killer burn after that, but HEY, don't worry theres always a repair gun for that! (Repair Gun: I think that EA got a little lazy)

The repair gun owns. And you can't think any of us compare to Havoc (or any of the other 1000-credit characters).

However, the obelisk misses sometimes, whereas I don't see anyone survive the agt. Though a missing oby might also give you a heart attack.

I still think that EA got lazy on the repair gun. I mean common a repair gun.

im sure you will like thrash300's feet then.

if the obi hits havoc in the head he will die.

i would choose nether, i would run away

I think dying by any of them would be painful... even by the obi.. its fast but not that fast.. as you if all take count.. you hear each and every soldier screaming before he dies in all the cnc games.

lol

Maybe the drunk firing squad would be so drunk they would be freindly: "Aw come mon felluh's lets just *burp* rap *belch* here there! have yer self fa drink! *burp* brain damage *belch* you see?". Thus they invite you round to the Hand of Nod for a pint.

All weapons have a name, the Repair Gun's is "Gizmo" '.'

Probably the Obelisk Of Light, but i can't see dieing from the AGT hurting that much, even with the machine guns it shoots so fast and takes less than 1 sec for you to die.

But if it were actually me and an AGT missile was flying at me, I'd just cover my face so t doesn't burn, it wouldn't hurt that much, while at the same time catching the machine gun bullets in my hand and throwing them back

The bad firing squad might just miss, or hit something non-vital. Worst case scenario, they get a gut shot and you lie there in agony for half an hour or so while you bleed to death.

The Obelisk would be quick and painless... and save you quite a bit on funeral arrangements.

The AGT would...well, it depends on whether you want to use the TD AGT or the Ren AGT. The TD AGT would blast you with a missile... the Ren AGT is a bit of a meat grinder. Not that it would matter much, as the end result is the same- one less ape running around on planet Earth.

So the firing squad offers the best and only chance of survival, but the greatest chance of lying in pain for a while before checking out. The Obelisk offers the best chance of getting it out of the way fast, since you really wouldn't feel the laser in the half-second it took to vaporize you. The AGT would kill you surely enough, but how is a completely different story.

No, because in order to kill you with a repair gun, they would have to bash you over the head with it

I didn't realise beacons or C4 posted on forums.... ^^

Anyway, if you somehow are a beacon or block of C4 a repair gun would disarm you, not kill you
