Does anyone happen to know where I can download the maps used on UN Rules New maps and other New Map servers? I tried Un Rules but their map download section is not working.

Google has so many hits that have absolutely nothing to do with downloading maps... I don't have the time to sort through all 2,000 pages to find what I want. Isn't there some maps hub for downloading maps for differnt servers?

I would think that if you are looking for maps used on the UNRULES server you would check the UNRULES website.

Their downloads are linked to RenMaps old url: "renmaps.neonhosting.com". Just use RenMaps.com as Blazer said.

Does it matter if the map download site is in a different language or will the maps be different in some way?

If you direct link the url, you will still be directed to a porn site, you need to copy and paste the url to direct to the real renmaps. Please remove the [url] tags.
