Courtesy of Strike Team:

Quote:The XWIS & Strike Team servers will be down for approximately 15-30 minutes on Tuesday 5th September at 9.50 am CET to allow the following servicing to be done by our hosts:

- 1) A new controller to be added to ST's server to give us more space.
- 2) All XWIS servers to be moved to a separate part of the network so that we are not effected by general maintenance and downtimes on the main part of the network.

The actual work is not expected to take more than 10 minutes, however be prepared for up to 30 minutes downtime on All XWIS game servers and Websites to allow for the servers to be taken down in advance, restarts, and any other eventualities.

For time zone conversion's sake, this is going to be early morning in the US, 12:50am my time, Arizona.

what time would that be in GMT?

i expect it should be around dinner time here when it goes down.

thanks for the alert.

oh.
because of DST, i think britain is at GMT+1 at the mo.

By my calculations, this is only an hour and a half away. I was trying to get my WOLProxy finished by then but it doesn't look like I'm going to quite make it.
