Try chaning what the controller does, since the vehicals come from the controller.

if you changed the building type of the WF to 'soldier factory', wouldnt it act just like a barracks, with the vehicle screen 'unavailable'?

or do you mean other changes?

i just tested that briefly, i changed the object you get when buying a hummvee to a rocket launcher.

now, the rocket launcher spawned at 0,0,0 and i was given some sort of machine gun(like the humvee weapon).

edit: never mind, ive used this mod package as tests several times, and gave the orca machine gun to a gdi char.

gbut the powerup still goes to 0,0,0

p.s. something weird happens when i give the orca gun to a soldier:

here i am shooting myself, where the bullets are coming from is where i spawned

and after using a pt, it shot from where i stood

i know about that ^ but what im trying to do is make the airstrip and weapon factory work as a

character classes..

buggy = gdi officer  
apc = gunner  
artillery = .....

humve = nod officer  
apc= SBH  
MRLS= .....

i have tried eveything in lvl editor no luck so far it must be possible.

i have seen it on some servers

I've been planning to write a script that will allow you to replace vehicles and characters in the PT with powerups and have it work correctly. But theres no way you can do it unless you know how to script.

This is so easy. :/

Just replace the warfan controller with the barracks one and place it on the building.

Now you can buy troops in the war.

What about the Alt+click on extras mode? You could make it so vehicles are disabled and have to alt-click on the normal infantry button to get to the other teams' infantry.

true.

but when a ladder does get made, then there will be a point in them.

how did the laddersystem worked?

if it worked with points, then wont you rank rises far in the sky when you play in a laddered co-op server?

---

Subject: Re: weapon factory=weapons

that is a bad thing; on co-op games, wins will rise, kills will rise, and so will points, whereas deaths

will be less frequent.

i dont know when it went down, but it was shortly after i started playing, as my first username(futura83) actually has a few stats displayed for it.

My online name, LR01 is about rank 2000

(I started playing Renegade 3 years ago)

But back to the topic, isn't weapons bug things done with scripts?

thw wf controller has something about it that makes the wf create vehicles the way it does.

this explains why the wf and airstrip have dif sections on the preset tree.

i have tried what i know of level editor...NOT ALOT

1,adjusted the wf/airstrips to character classes and changed all vehicles to players and weapons  
.Does not work wf/strip just make normal vehicles regardless of changes

2, replaced the wf/strip to barr/hon controller .Does not work the vehicle screen just goes blank as in something is being built. nothing gets made when finished

---

Close the level editor and save the presets, then take objects.ddb from the presets folder, rename to objects.aow (if you have ssaow (recommended)) and place in servers data folder.

Does not work and ssaow disables most of my characters ?

Make sure the preset names for the controllers are edited and you save it as objects.ddb (by closing LE when you're finished and clicking yes to save presets).

---
