Heh...I should have said "good". Spaceports is a crappy host with a crappy site and crappy service, i used them along time ago for something else and i quickly changed to a different host...I'm looking for cnc/renegade hosts. I know planetcnc hosts but i'd like to find others and check them out too.

Well since the second line on www.cnchq.com states:"Note: We do not host websites, just your files. "i guess i'm gonna have to go with jamieuk20...but i looked on that site and i couldn't find anything that mentions hosting or a hosting link or whatever... how would i get hosted? shady what's your e-mail???(btw, at least 50-100megs, unless that's too much than i'll just host the site off of it and put the files somewhere else and just need at least 10-20megs (rather have

space for the files, cause fileplanet sucks), php/cgi support and if possible a mysql database)what kind of advertisements are put on the sites(if any) (WxH?)
