Heya, is anybody else getting crashes on the musica console command? im running scripts.dll 2.9.2 on the server

finewth69 has 2.3, and me + crakjack had 2.9, people without any scripts.dll did not crash

however the crash doesnt happen all the time and wasnt a one-off

that looks like a bug in your bot, it is sending spooked commands to the FDS crasing it. i has this same problem, just in a different circumstance.

Theres a known crash bug in the background music stuff, I forget what causes it though.

Based on that crashdump, I expect the problem is that, for whatever reason, the mp3 decoder (or the mp3 decoder when called the way the music code calls it) doesnt like the mp3 file you are trying to play.
I know we had similar problems with a set of C&C music (TD and RA1) and trying to play that inside renegade.

well BlackIntel calls the MUSICA function from within scripts.dll and they dont crash at all.... :S
but that would b basically the same as useing the MUSICA cmd wouldnt it?

It depends exactly which call Black-Intel are using.

Maybe like what JW said, you're calling songs that the codec doesn't like. Try these, i manually put them in my ini and have no crashes.

Renegade Music

Name	[Mapnum]	Trackname (IS case sensitive)	Time
Command and Conquer	= M01	= 01-command&conquer.mp3	= 175
Packing Iron	= M02	= 02-packing iron.mp3	= 198

Exactly my point, there are two versions of the mission tracks in always.dat (no idea why) some have prefixes others don't. Try the ones with the prefixes (IE: 01-command&conquer.mp3 or 08-sniper.mp3 etc).

And to my knowlage "level 0 ..." stuff is dialog.

Did every player crash, or just some of them?
Does it always crash on the same song?

its not on the same song.... it seems to be random, sometimes a song will work, and sometimes a song will not work

and only players with scripts.dll crash, also, sometimes one player will crash.. another wont, later on another player would crash, but the one from before will not

it really does seem to be random.... however i log i posted was luck that everybody with scripts.dll ingame crashed lol

All i can say is that it does not crash on my server for anyone. I've been doing the raw FDS commands since it was implimented in scripts.dll and i've had not one problem.

have you tried using the NightRegulator in-built jukebox?

Yes, with a personal edited ini to fix the music to the prefixed ones and put them all in alphabetical order.

I would but a recent format deleted it all.

Take my renegade music file which was posted above and use that.

NR Pre-BETA 4 uses the prefix songs

and still have problems with crashes - not as much though, did you change yours coz of the song crash?

Try to remove the songs which give trouble temporarily, then see whether it's just a few or if it could be any song?

I might have had some crashes related to this today and yesterday, I have not really looked into that though. It just crashed a few times... Could be anything really...

No, and before the jukebox i directly called them from the FDS.

It could be RenGuard? I personally don't use it since i've had so many problems with it.
