the tons of writing tells you how to USE the 'map maker'

you need two programs to make maps for Renegade.

1) Gmax, install this first

<http://files2.turbosquid.com/Products/L567271/XFM83W83US/gmax12.exe>

2) Renegade public tools, install these AFTER gmax

<ftp://ftp.westwood.com/pub/renegade/tools/RenegadeToolsInstaller2.exe>

since you don't want tons of writing I will leave you to work out how to use them on your own...

Don't forget, you can't register gmax anymore so you need the gmax registration workaround from this page:

[http://www.renegadecommunity.com/mod\\_tools.php](http://www.renegadecommunity.com/mod_tools.php)

gl mapping!

I'm pretty sure that turbosquid is taking care of the registration/activation codes and all that now.

---

<http://www.turbosquid.com/registergmax/>
