this shotz guy also was known as {WG}LordEsiDe

He supposedly makes 9000 dollars a month and a 1337 website maker. From my experience with him, hes a 16 yr old kid. With no job, or making minimum wage.

Also note on his members page I seen the other day, hes got himself listed twice trying to make the clan look bigger then it really is, hes listed as DLoCLoRdEsiDe and sh0tz.

He was actually removed from our members list because he was "supposed" to be setting up a box by Friday (which was two or so weeks ago)

By Monday he hadnt shown his face around, so he confirmed the fact that he was full of shit. Promises you cant deliver on dont make for a good clan Leader Lord or should I say sh0tz.

Once he realized he couldnt hold up his end of the deal he just stopped coming around then formed his own clan. So dont let this guy fool you, he talks big and cant deliver on his word.

(1) Spamming is for tards.

(2) eX-7rem3 and LordEsiDe share the same IP address on the RenGuard network and have used their names interexchangably there and on gamespy ... as well as my forums. Therefore, I would assume that they are the same person.

(3) Spamming is for tards.

should i be worried. The way I see it, I have every right to come here and give your clan a "bad" rep as you said in gsa.

You bold face lied to the guys (including me) in {WG}

I love it when people don't know what the fuck they're talking about on their sites.

"DLoC on mIRC!" Hint: it's not called "mIRC". If you can't figure out what it's supposed to be... close your channel.

Also, maybe this kid should start typing like he's almost 20 years old. Yes, I can say "kid" because I am older.

it is called mIRC (IRC) for short. maybe you should go to the website? [www.mirc.com](http://www.mirc.com) and please dont try correcting someone if it doesn't need to be corrected.

It is impossible for your clan to be "on mIRC" unless of course you are suggesting that they are all on your screen while using mIRC. mIRC is an IRC client program which allows you to connect to an IRC server using the IRC protocol. j\_ball430 is right: you're on IRC not on mIRC. You use mIRC to get on IRC.

No, you're an idiot. There's a reason why IRC is capitalized in the name, is there not? It's because IRC is the protocol that I was talking about. mIRC is just one IRC client of many. Therefore, "DLoC on mIRC" is incorrect. It should be "DLoC on IRC". Don't you dare tell me that you're correct. I run a god damn IRC network.

Okay, so then what the fuck were you going on about me not having to correct you becuae you're right? If you have been on IRC for 9 years, you wouldn't have made that mistake on your site, and you certainly wouldn't try to be claiming that you were right.

Exactly. Not to mention, if you are who Smoke and I both think you are (which I wouldn't doubt) then how old were you when you started your nine years of experience with IRC administration? \*chuckle\* It would have been one thing to say "oopsie, I meant to say 'on IRC' rather than 'on mIRC'" but instead you decided to defend yourself and attack another which is why you're arguing now. Any adult who knew what he was talking about would have stood corrected rather than defend inaccurate information.

14 posts (half of which were in this thread alone). So tell me, how old are you ... where have you been for the last 5 years of Renegade history ... and why do you find it necessary to tell the community experts that they are wrong when they correct you?
