That happens if you try to use someone elses nickname.

Be sure noone else already uses your nickname and if you're sure: be sure to use the correct password!

Try with another, non used, name and password if you can't manage it with the current one.

I tried it with 3 different nicknames... still no list. I haven't been using other people's usernames, and when I log in with my other nick, on my buddylist... it says my main username is not logged in, so no one is using it.

The usual news.  
"Welcome to XCC Online!  
725 players (605 RG) Are online  
For answers to all you etc etc etc"

Hmmm strange that it does give you the correct motd.  
  
www.strike-team.net -> can you give your post a try there as well? They own xwis.

:/ I hate strike-team.net... they banned me several times for no reason on ra2. Plus people never respond (or at least takes a month to respond) to a thread. I posted there, but I got nothing.

open up your host file, should be something like: C:\WINDOWS\system32\drivers\etc\hosts

Look to see if you have these 2 lines:

195.13.63.187 irc.westwood.com  
195.13.63.187 servserv.westwood.com

---

If so then go to <http://strike-team.net/nuke/html/modules.php?op=modload&name=Downloads&file=index&req=getit&lid=4> download that and run it and click reset(wol).
